# ConfirmDelivery for Windows

Get the same software on your desktop that you use to prepare online signature and delivery confirmation mail! It still includes multi-criteria and multi-event search to maximize your flexibility.

**More options: batch and file merge capabilities • Greater convenience
No additional expense for the software, maintenance or support**

Key Features

- No maintenance or support required
- Maintain data privacy (e.g., medical, financial, legal environments)
- Upfront address verification/correction with zip+4 assignment
- Return Merchandise Service - labels generated simultaneously if desired
- Import/export tasks eliminated – direct connect to your data
- Generate shipping labels or address sheets
- Configurable margins for various label stock
- Installs on any PC and connects seamlessly to multiple database types:
  - Enterprise Resource Planning
  - Customer Relationship Management
  - Warehouse/Shipping applications
  - Excel/SQL/Oracle and more

- Rapidly processes large volumes in automated environments
- Versatile batch processing/data extraction capabilities for mail-merge applications
- System works behind the scenes
- Streamlines generation of mailing labels or address sheets for USPS signature or delivery confirmation
- Maximizes information management with two-way integration
  - pull data from company system for addressing:
    - recipient
    - internal reference number
    - notice
  - push data back to your database:
    - USPS corrected address
    - USPS tracking number
    - Expected delivery date
    - Shipping Zone
    - Weight
